**Apave: Managing your risks,
ensuring complete safety for
your activities.**

- Inspection • Training • Tests & Measurements
- Certification & Labelling • Consulting & Technical Support

COUNTRY

Our activities in India

Apave is an international group with over 150 years of experience in risk management. Our employees operate in nearly 60 countries, supporting clients with crucial regulatory and non-regulatory assignments. Apave has significantly expanded its footprint in India since 2016 through the strategic integration of several well-established national companies. This concerted effort has created a powerful, collaborative presence in the region, building on collective heritage dating back to 1975. Apave in India is now fully equipped to provide complete services, dedicated to ensuring the safety of people and assets, protecting the environment, and optimizing performance for our clients across the country. We offer expertise in the Apave Group's five key business areas: Inspection, Training, Certification, Tests & Measurements, and Consulting & Technical Support.

Inspection

We offer comprehensive range of inspection services, covering all project stages, ensuring safety, environmental protection, and accident prevention.

- Building inspection
- Shop & site inspection
- Shutdown inspection
- Lifting and piping equipment inspection
- Pre-shipment & pre-dispatch inspection
- Vendor assessment & qualification
- Performance test witnessing
- Welding & NDT personnel qualification
- IBR Competent Person Services
- PNGRB Inspections
- PESO-Third-Party Inspections

Design Review & Verification

Inspects a wide variety of raw materials, product forms, and fabrications, such as:

- Components: Plates, valves, casting, forgings, wire ropes, flanges and fittings
- Structures & Vessels: Pressure vessels, tanks, heavy structures, piping, and pipelines.
- Machinery: Cranes, processing plants, onshore rigs, drilling equipment, well stimulation equipment, pumps, and generators.
- Electrical & instrumentation: Anti-corrosion coatings, electrical panels, motors, transformers, cables, batteries, anodes, solarpanels, and measuring instruments.

Training

We build and enhance technical knowledge, skills, and competency of your personnel in inspection, quality control, and asset integrity management. Our programs are for engineers, technicians, inspectors, and safety professionals across various industries.

- Safety training
- Welding techniques awareness
- Skill development in technical fields

Certification

We assess and verify products, systems, and processes against established standards and client specifications, providing assurance of compliance, safety, quality, and reliability.

ASME Certification

- Shop certification
- Inspection & U/R stamping
- Joint review support
- Authorized Inspector supervisory services

Product Certification

- Pressure Equipment Directive (PED)
- Transportable Pressure Equipment Directive (TPED)
- Welding material certification

CE Marking / Certification

- Machinery and lifting equipment
- Personal Protective Equipment (PPE), Low Voltage Directive (LVD), Electromagnetic Compatibility (EMC), and more.

Focus on Comprehensive NDT Solutions for Uncompromising Quality

Our expertise in traditional and advanced digital techniques provides critical insights without compromising material structure. Empowers industries to maintain safety, optimize performance, and extend the lifespan of your infrastructure.

Core NDT Capabilities:

- Digital and Conventional Radiography
- Ultrasonic Testing (UT)
- Magnetic Particle Testing (MPT)
- Penetrant Testing (PT)
- Advanced Ultrasonic Testing (PAUT & TOFD)

Specialized & Supplementary Service

- Close Proximity Radiography
- High-Sensitivity Radiography
- Reverse Engineering Support
- Radiation Protection & Safety
- Cabinet X-ray
- Positive Material Identification (PMI)
- Hardness Testing
- Ferrite Measurement
- Remote & Specialized Inspections
- Civil Structure Assessment

Focus on Hydrogen Power Generation Systems

We offer specialized services to support the growing hydrogen power generation sector, focusing on technical due diligence for Electrolyser OEMs and consulting for PEM Fuel Cell certification. We will help you navigate the complexities of this innovative industry with confidence.

Technical Due Diligence for Electrolyser OEMs

- Operations & maintenance
- Operational parameters
- R&D capabilities
- Cost analysis & pathways to \$1/kg
- Team overview
- Project references & testimonials
- Quality control
- Technology-specific review
- Cost benchmarking
- Quality management systems

Consulting for PEM Fuel Cell Stack Certification

- Engineering review (process and mechanical design)
- Safety design
- Safety audits
- HAZID/HAZOP services
- QRA studies

Consulting and technical Support

We offer a full spectrum of risk and engineering assessment services to identify, evaluate, and mitigate hazards, ensuring operational safety and asset integrity.

Risk Management & Safety Studies:

- Process Risk Assessment (HAZOP, HAZID, QRA, FMEA)
- Technical Safety Studies (SIL, RAM, Explosion Analysis, F&G Mapping)
- Environmental/Health Studies (Dispersion, Noise, Vibration)
- Operational Audits (Fire Risk, QHSE Compliance, SIMOPS)
- Emergency & Culture (EERA, Safety Culture Programs)
- Hazardous Area Classification

Asset Integrity & Life Extension:

- Fitness-for-Service (FFS) & Fit-for-Purpose (FFP) Assessments
- Remaining Life Assessment & Life Extension Studies
- Risk-Based Inspection (RBI)

Agri- Food & Global Trade Solutions

Through our subsidiary, Baltic Control, we provide end-to-end quality, compliance and risk mitigation solutions for the Agri-Food and global trade sectors across India and South Asia.

- Trade Inspection & Verification (Pre-Shipment, Cargo Quality, Quantity Assurance)
- Agri-Food Lab Testing (Commodity Analysis, Traceability, ISO 17025 Accredited)
- Trade & Sustainability Certification (ISCC, Food Safety, Management Systems)
- Organic Certification (NOP/APEDA for EU/Switzerland Export)
- Government Conformity (VoC Programs, UN/NGO Inspections)
- Operations Oversight & Audit (Cargo Superintendence, Warehouse/Vendor Audits)
- Commodity Testing (Metals & Minerals Assaying and Grade Analysis)
- Future Services (ESG, Decarbonization Verification, Digital Certificates)
