RE: APPROVAL OF Apave Mare's TRAINING COURSES

VMSL responds to your request for approval of (3) three MODU training courses. Approval is granted until 15 December 2025 for the following courses:

MOU Stability Course
Barge Supervisor
Offshore Installation Manager

Should non-US officer personnel attend your courses for OIM, Barge Supervisor and/or Ballast Control Operator, VMSL will accept Apave certificates of a satisfactory pass as evidence of their partial training, and as written assessments required under the provisions of IMO Resolution A.1079 (28). VMSL will issue OIM, Barge Supervisor or Ballast Control Operator licenses, provided, of course, that they can adequately document that they have completed all other training requirements specified in A.1079 (28) for these positions. In other words, all other skill sets and training must still be demonstrated and documented.

This approval will remain in effect as long as the courses syllabi remains unchanged. VMSL's approval is valid through 12 December 2025. Should significant modifications be made to any course, copies of any new syllabus must be provided for approval.

In order for VMSL to approve any STCW course, VMSL will require a Copy of the external audit report.

An electronic copy of this letter shall be effective until receipt of the original letter which shall serve in lieu of a Certificate of Approval.

Best regards,

Captain Patrick Michael DeCharles II
Executive Vice President
by direction of the
Deputy Commissioner of Maritime Affairs
